

# COVID-19 QUESTIONS

A philosopher named Mencius once remarked, *"To act without clear understanding, to form habits without investigation, to travel a path all one's life without knowing where it really leads; such is the behavior of the multitude."* Most people don't ask questions and so are easily deceived. Are you one of the unthinking "multitude?" Here are some pertinent questions concerning COVID-19. See if you can find the answers. For more info: <https://pandemic.news/>

- ✓ Hospitals are incentivized to register a patient as COVID-19 to receive a \$13,297 Medicare reimbursement; additionally, they receive \$40,218 for putting a patient on a ventilator. Do you see a "MONEY MOTIVE" conflict of interest in this "rewards program"? Is it possible that hospitals would say a person has COVID-19 when he/she doesn't, thereby resulting in a FRAUDULENT total COVID-19 cases & deaths?
- ✓ Medicare reimbursement for COVID-19 tests will be \$36 for EVERY CDC test and \$51 for ALL those created in house or by other entities. Follow the money. Who benefits from all these tests being marketed by corporate media and sold? And what are they testing for? No legitimate test for COVID yet.
- ✓ Koch's postulates are four criteria designed to establish a causative relationship between a microbe and a disease. No top medical research paper (Zhou, Kim, Poutanen, Drosten, Ksiazek, Peiris) has met Koch's criteria. NOT ONE! This alone places COVID-19 as the cause of a pandemic WITHOUT SCIENTIFIC MEDICAL PROOF. Why do you think this might be?
- ✓ These major research papers indicate that COVID-19 has never been ISOLATED, PURIFIED or VISUALIZED. How then, can anyone say who does or doesn't have the alleged COVID-19 virus?
- ✓ Because COVID-19 has not been ISOLATED, PURIFIED OR VISUALIZED what's the point of taking a reverse transcription polymerase chain reaction (RT-PCR) test, or an antibody test?
- ✓ The RT-PCR test can't look for a virus that's never been ISOLATED. It can only look for something that is associated with what people consider "viral activity." Why isn't Mainstream Media reporting on this?
- ✓ Medical professionals as well as corporate media admit that the RT-PCR test is HIGHLY INACCURATE, even apart from the fact that the virus hasn't been visualized. Does that sound like a test you still want to take? Who benefits from the creation of all these tests? Could harm come to you if you take such a test?
- ✓ According to the CDC, regular seasonal influenza afflicts, hospitalizes and kills FAR MORE people than COVID-19. Why, then, would we shut everything down when we deal with MUCH WORSE every year?
- ✓ Consider Chicago Health Official Dr. Ngozi Ezike's statement: *"If you were in hospice and had already been given a few weeks to live, and then you also were found to have COVID-19, that would be counted as a COVID-19 death. It means technically even if you died of a clear alternate cause, but you had COVID-19 at the same time, it's still listed as a COVID-19 death. So, everyone who's listed as a COVID-19 death doesn't mean that that was the cause of the death, but that they had COVID-19 at the time of the death."*
- ✓ Forced closures are destroying lives, leading large numbers of people to bankruptcy and homelessness. The "stimulus" will devalue our dollar and lead us into hyper-inflation and a cashless society. If we let that happen, America, 'LAND OF THE FREE' is finished!
- ✓ Dr. Russell Blaylock (search) warns that not only do face masks fail to protect the healthy from getting sick, but they also create serious health risks to the wearer. By wearing a mask, the exhaled viruses will not be able to escape and will concentrate in the nasal passages, enter the olfactory nerves and travel into the brain. The bottom line is: if you are not sick should you wear a face mask – and be restricted to your home? Where is the basis in law for this?
